

I am writing to comment on the National Association of Broadcasters petition 04-160 to limit local content (traffice & weather) that satellite radio can offer I respectfully urge the FCC to reject the NAB's petition 04-160 because it stifles competition in the marketplace and denies content to me that would be helpful. I would surely benefit by having local content (traffice & weather) available to me on my satelitte radio service since my primary source of information while on the road is the satellite radio service. I pay for services that are unavailable elsewhere and feel that the National Asociation of Broadcasters should not have the right to dictate what I can hear.

Thank you for your consideration,
Richard P. Matisak
